Lara Nesselroad

**Change is Inevitable, but Chaos is Not: Supporting Staff through Organizational Change** *(AM Session)*

Lara is the Manager of the Math Library and Price Science Commons & Research Library for the UO Libraries.

Lara graduated from UO with a BA in English in 1992, and is in her thirtieth year with the UO Libraries. She worked as a student in Circulation from 1987 - 1991, then as a Library Technician 1, 2, and eventually Library Technician 3 in some of the same positions as Eric in the Knight Library before moving to an OA position in the Science Library in 2000. She supervises two staff and approximately 25 students working in two branches, doing everything from checking out and shelving books to tutoring calculus and helping users with their files for 3D printing. She has led her staff through complete renovations of both branches in the last several years.

Lara lives in Eugene with her college-student kids still at home, and enjoys cooking, stories about superheroes (fictional or otherwise), leading occasional classes at the gym, and writing fiction.
