Garrett T. Stewart

Trust, Acknowledgment, and Collaboration Opportunities: An Employee Engagement Initiative
(PM Session)

Garret is a Network Engineer with the Data Center at the UO Information Center.

Early in his college career, Garrett accepted a student position working for Information Services as a Telecommunications Technician and maintained that position until he was hired on as a Technology Service Desk Coordinator by the same organization. Since then, he has served in various engineering positions within Information Services, ranging from a Systems Engineer to a Data Center Network Engineer. His main responsibilities include maintaining the network, storage, and computing resources of the University’s three data centers.
