Tyfanie A. Wineriter

Trust, Acknowledgment, and Collaboration Opportunities: An Employee Engagement Initiative (PM Session)

Tyfanie’s dream growing up was to become a Database Administrator (DBA), which she became at the University of Utah in 2003. Her following dream brought her to the University of Oregon in 2009. Her next dream was to present Database Administration at the Independent Oracle Users Group (IOUG), which she did in 2014 with the presentation "How RAC made me the DBA Goddess I am today." Tyfanie’s newest dream is to learn Project Management and IT Service Management to make Information Services (IS) a better place to work; become an extrovert; smile as much as possible, as well as be the best DBA she can be; so far, this is going very well.
