Courtney Ball, Career Center

Promoting Inclusion in the Workplace through Supervision (AM, PM)
Engaging Student Employees through Learning
Creating a Mentoring Based Partnership

The Student Employment Enhancement campus-wide effort, also known as SEE, seeks to promote and improve the professional development and employment outcomes of University of Oregon student employees. Most employers want meaningful experience in college graduates including demonstrated communication, critical thinking, problem solving, and team work competencies. Through active engagement of on-campus employer partners and mutually beneficial collaboration across campus, SEE is developing a suite of professional development tools, resources, and support for student workers, their supervisors, and departments to collectively enhance the professional readiness of our college graduates.
